

Enkitech gets Oracle BI Publisher up and running at breakthrough speed with InstantOn rapid deployment.

As a company's databases grow and become more critical to day-to-day business functions, the ability to quickly access and deliver that information to the right people, at the right time, and in the right format becomes equally important. Yet today, most corporations use outdated reporting systems with limited flexibility and extensibility, yet still require significant IT resources to create new reports or simple modifications. This leads to frustrated users, unnecessary calls to the help desk, and a logjam of requests for new reports that are critical to the business. To alleviate or avoid these problems, you need Oracle Report Server implementation from Enkitech.

ORACLE®

Break the bottleneck.

Enkitech's Oracle BI Publisher deployment solution takes control of the reporting resources, ensuring reporting performance and flexibility as your company's needs grow. By processing report requests via a queue on the server side – instead of on the client side – the system helps eliminate slowdowns while giving the IT department complete control over database server performance. If additional capacity is needed to maintain peak performance, IT can simply bring more report servers online via software. Additional features of this solution include:

- ▶ Ability to report against almost any data source or database
- ▶ Ability to output reports in almost any format, including pixel-perfect hard copy
- ▶ Configurable to run any number of reports simultaneously, allowing for balancing of capacity with load
- ▶ User workstations are freed up immediately after requesting a report as opposed to being responsible for running the report.
- ▶ Multiple report output formats can be easily deployed to handle specific reporting needs – batch, high volume output, C-level, etc.
- ▶ Report output can be written back into a database which can then be used to secure the report output

Faster reports. As fast as possible.

Your company can experience the superior functionality of an Oracle Report Server setup in just two weeks thanks to Enkitech's InstantOn deployment services. In just 10 business days, and for just \$15,000, a two-person team of Enkitech experts will deliver the following:

- ▶ Installation of the Oracle BI Publisher environment, including the Oracle Application Server
- ▶ Configuration of a load-balanced Oracle BI Publisher architecture (two report servers minimum)
- ▶ Creation of up to three key reports
- ▶ Configuration of the Oracle BI Publisher Scheduler
- ▶ Knowledge transfer related to monitoring and management of the Oracle BI Publisher environment

Think about it. In just 10 business days your company can enjoy database reporting that's fast, functional and robust. Thanks to the combined strength of Oracle and Enkitech.

The Enkitech difference.

Enkitech is a Dallas-based information technology services firm specializing in Oracle. Our database consultants average 15 years of hands-on Oracle experience, making them some of the most knowledgeable Oracle experts in the country. We offer services in Oracle Database Administration, Oracle Application Development and our unique On Call Service – an innovative offering that provides remote services for Oracle Systems. With a rare mix of development and database administration expertise, Enkitech has the ability to step into the largest, most complex environments and instantly make an impact.
