

With InstantOn, Enkitec deploys Oracle Business Intelligence Reporting nearly instantaneously.

Garbage in, garbage out. That's been the mantra of database users since the dawn of the computer age. But today, it's not enough. Not when large amounts of good data can easily overwhelm underpowered departmental databases and reporting solutions like Microsoft Excel and Access. And when your business decisions and compliance mandates depend on having good intelligence in hand, such delays can easily become missed opportunities. That's why you need the power of Oracle solutions implemented by Enkitec.

ORACLE®

Intelligent intelligence.

Oracle Business Intelligence Enterprise Edition (OBIEE) puts the knowledge you need right at your fingertips. Able to interface with nearly any data source for which an Open Database Connectivity (ODBC) driver exists, OBIEE combines data from multiple sources into one system without having to consolidate or move information. Web-based dashboards and controls allow access from anywhere in the world while permitting a level of security unavailable in a more fragmented setup.

Additionally, the OBIEE suite includes Business Intelligence Publisher (BI Publisher). This powerful reporting tool lets users build report templates in familiar programs like Microsoft Word and Excel. With BI Publisher, the developer sees the exact output format as it is being built, making publishing quicker and easier.

Get smarter. Faster.

With Enkitech's InstantOn deployment services, you can have a fully operational Oracle Business Intelligence Enterprise Edition setup in place, analyzing data and churning out reports in two weeks and for under \$15,000. A team of two Enkitech experts will, in just 10 business days, deliver the following:

- ▶ Implementation of the OBIEE architecture including BI Publisher on your hardware
- ▶ Identify up to three Key Performance Indicators (KPI) from a single data source
- ▶ Create an OBIEE dashboard containing reports and analytics for the three KPIs
- ▶ Develop two Business Intelligence (BI) Publisher report templates
- ▶ Transfer of knowledge for managing the OBIEE Report Server environment (Additional fee based training available)

Two weeks is all it takes to completely transform your BI architecture and put your company on the path of having the right information – right when you need it. That's the combined power of Oracle and Enkitech.

The Enkitech difference.

Enkitech is a Dallas-based information technology services firm specializing in Oracle. Our database consultants average 15 years of hands-on Oracle experience, making them some of the most knowledgeable Oracle experts in the country. We offer services in Oracle Database Administration, Oracle Application Development and our unique On Call Service – an innovative offering that provides remote services for Oracle Systems. With a rare mix of development and database administration expertise, Enkitech has the ability to step into the largest, most complex environments and instantly make an impact.
